LZD 2803

REAR MULTIFUNCTION LIGHT ROCA LZD 2803 WITH HANDLE

TECHNICAL DATA

Light group	Light category	LED light
HOR 118	multifunction rear	yes
LED quantity	Rear position light	Rear direction indicator
27	yes	yes
Brake light	Side	Connection method
yes	universal	with handle
Supply voltage	Cable	Operating temperature range
12/24 V	4×0,5 mm2; cable length 1 m	from -30°C to +50°C
Ingress protection rating		
IP68		

DESCRIPTION

The ROCA line of multifunction lamps has been extended to include models with a special holder which allows for stable mounting in the hard-to-reach places. The tilted support provides the ability to change the angle of the lamp, and thus the direction of the light. ROCA LZD 2803 is designed to be mounted on the rear of the vehicle and combines the following functions: - position light (0,25/0,55 W); - brake light (2,3/4,7 W); - direction indicator (2,1/4,8 W). All ROCA lamps will find their application in special vehicles, agricultural and construction machines. The name of the ROCA collection and the applied materials undoubtedly emphasize the durability, resistance and indestructibility of the products. The lamps are distinguished by the following characteristics: - excellent mechanical strength (ABS + PC plastics); - good dielectric properties (PC); - very good impact performance at low temperatures (ABS); - high temperature resistance (polyamide PA66GF30); - UV resistance (PMMA); - high durability and long lifetime of LEDs; - low energy consumption; - high ingress protection rating IP 68; - universal supply voltage 12/24 V.
