DESCRIPTION

The **STRADA LZD 2829 combination lamp** is a functional solution designed for installation **on the left side of a vehicle**. Equipped with a reflective triangle, it ensures a high level of safety and excellent road visibility. The product is intended for a wide range of applications — it is ideal for delivery vehicles, agricultural machinery, trailers, and car transporters.
Integrated lighting functions:
– **rear NEON position light (2.2/5.5 W)** – uniform and clear light visible from a long distance;
– **brake light (2.8/3.6 W)** – bright and highly visible;
– **rear turn indicator (1.7/2.4 W)** – high intensity, ensuring clear signalling of direction changes;
– **fog light (4.8/5.5 W)** – essential in adverse weather conditions;
– **license plate light (0.5/1.2 W)** – ensuring compliance with road regulations.
Note! The lamp does not feature a reverse light function.

The STRADA LZD 2829 lamp is designed for intensive use. Its high resistance to moisture and dust, confirmed by the **IP68 protection rating**, guarantees reliable operation in demanding conditions. It is equipped with a 5-pin bayonet connector, enabling quick and secure electrical connection.

The **product has European E9 approval**, allowing it to be used on public roads. R10 approval confirms compliance with electromagnetic compatibility standards, meaning it does not interfere with other electronic devices in the vehicle.

The STRADA LZD 2829 is a robust and aesthetically designed rear lamp, making it an ideal choice for users seeking a durable and reliable lighting solution for commercial vehicles.
