from -30°C to +50°C	IP68	

DESCRIPTION

The **STRADA LZD 3008 rear lamp** is a robustly built LED combination lamp designed for commercial vehicles such as trailers, semi-trailers, and agricultural machinery. Mounted **on the right side of the vehicle**, it combines functionality, durability, and aesthetics.

Thanks to the **integrated triangular reflector**, it improves road safety by increasing vehicle visibility both during the day and at night. The lamp uses modern LED technology with a distinctive neon-style position light, which not only enhances visibility but also gives the vehicle a modern appearance.

The STRADA LZD 3008 offers the main rear lighting functions:
– NEON **position** light (2.2/5.5 W);
– **rear turn indicator (1.7/2.4 W)**;
– **brake** light (2.8/3.6 W);
– **reverse** light (2.2/6.4 W).
Note! The lamp does not include a fog light or license plate light.

Powered by 12/24 V, it is compatible with various types of vehicles. The 5-pin bayonet connector ensures quick and secure installation, while the **high IP68 protection rating** guarantees reliable operation even in harsh weather and terrain conditions. In addition, the lamp is certified with E9 and R10 homologations, confirming compliance with European safety standards and electromagnetic compatibility requirements.

Why choose the STRADA LZD 3008?
It is not only about functionality, but also durability and safety — the perfect combination for professionals who expect reliable solutions in everyday work.
