DESCRIPTION

The **STRADA LZD 3034** is a solidly built **right rear combination lamp** designed for demanding users of trucks, trailers, semi-trailers, as well as agricultural and construction machinery. Its compact and durable housing is equipped with efficient LED diodes that provide excellent visibility and road safety — both during the day and in challenging weather conditions.

The lamp features an **integrated triangular reflector**, which enhances vehicle visibility when parked, in accordance with current regulations. Thanks to LED technology with a neon-style lighting effect, the position light offers a modern and aesthetically pleasing appearance.

Lamp functions:
– NEON **position** light (2.2/5.5 W);
– rear **turn indicator** (1.7/2.4 W);
– stop (**brake**) light (2.8/3.6 W);
– **license plate light** (0.5/1.2 W);
– triangular reflector.
Please note: the lamp does not include a reverse light or rear fog light.

Powered by 12/24 V, it is compatible with various vehicle types. The 5-pin bayonet connector ensures quick and secure installation, while the **high IP68 protection rating** guarantees reliable operation even in harsh weather and off-road conditions. In addition, the lamp holds E9 and R10 approvals, confirming compliance with European safety and electromagnetic compatibility standards.

Why choose the STRADA LZD 3034?
1. Modern LED technology = lower power consumption and longer service life.
2. Durable construction resistant to harsh weather conditions.
3. Quick installation thanks to the standard bayonet connector.
4. Full E9 homologation – approved for legal road use.
